Xiant Filer Crack Free License Key [32|64bit]

[Download](#)

Xiant Filer Crack is an add-in for Microsoft Outlook that helps you more efficiently manage your e-mail. Filer simplifies the task of keeping your inbox organized by allowing you to file messages with a single click. Filer also keeps you focused on important topics in your e-mail without being distracted by the contents

of your larger mailbox. If you use Microsoft Office Outlook as your e-mail application, Xiant Filer can instantly help you become a more efficient user of e-mail. Filer is an add-in that integrates seamlessly into the Outlook application. It enhances Outlook's underlying message-filing capabilities, making it easier to keep your e-mail organized by quickly filing messages to folders in Outlook.

Filer also offers an alternative topical view into the contents of your mailbox. Each topic watches for and collects only messages from targeted e-mail threads. Create a topic and use it as an alternative to your inbox to actively track only a subset of messages in your mailbox. [b]Filer features - Instant switching between filtered inbox and all messages - Windows and Mac

compatibility - Works with all versions of Microsoft Outlook - Never miss a message again - Folder creation and removal - Folders are named according to the topic, e-mail thread or sender - Subfolders can be created to organize messages further - Email filters can be applied to specific folders and/or subfolders - There are three different filter types to suit your needs - Read only -

Mark as read - Mark as unread - It is recommended to create a new folder to store your filtered emails - There are 7 different categories available, including: * Business * Family * Personal * A one-click folder * Hijack: "Texts" for adding some of your old high-speed SMS messages to Outlook; "SMS" for adding a category for all incoming texts, and "Events" for adding all of your calendar

events - There are several small options to configure the Filer main interface - Email filters to limit what types of messages you will receive or to automatically label messages as "read" or "unread" - Links to frequently used folders - It is possible to use one filter for different categories - Auto shutdown and exit after the last mailbox is closed - Send feedback via Twitter -

What's New In Xiant Filer?

MS Office Outlook is the industry's most widely used e-mail application and home to most people's inboxes. The current version of Outlook has

received many updates and improvements. When you get a new message, you open the new message window in a new window. For e-mails in your inbox, you can keep track of your most recent messages in the Inbox window. To keep track of new e-mails in other folders, you must check those folders. Once you have finished reading the message, you close the window to move on to the

next e-mail message. One problem with using Outlook is that you cannot easily view the contents of your inbox without opening each message. That means that when you have a lot of messages, you must open and close a lot of windows. Using Xiant Filer will help you view the contents of your inbox while you are working on other tasks. Filer is an add-in for Microsoft Office Outlook that

helps you more efficiently manage your e-mail. Filer simplifies the task of keeping your inbox organized by allowing you to file messages with a single click. Filer also keeps you focused on important topics in your e-mail without being distracted by the contents of your larger mailbox. If you use Microsoft Office Outlook as your e-mail application, Filer can instantly help you become a

more efficient user of e-mail. Filer is an add-in that integrates seamlessly into the Outlook application. It enhances Outlook's underlying message-filing capabilities, making it easier to keep your e-mail organized by quickly filing messages to folders in Outlook. Filer also offers an alternative topical view into the contents of your mailbox. Each topic watches for and collects only

messages from targeted e-mail threads. Create a topic and use it as an alternative to your inbox to actively track only a subset of messages in your mailbox. Additional Info: Do you have a large inbox? Do you have trouble remembering which messages you have already read? Filer is a powerful add-in for Microsoft Office Outlook that helps you organize your e-mail and focus on what's

important. Filer allows you to focus on the specific messages in your inbox and file those messages into an organized folder structure. File messages by single-clicking a folder in your inbox. Filer also allows you to file messages into a new folder every time a new message arrives. Move messages that are related to a specific topic to the appropriate folder, which automatically

reorganizes the rest of your messages. Use the topical view to more easily manage your inbox and focus on only those messages that are important to you. Each topic watches for and collects only messages from targeted e-mail threads. Filer also allows you to quickly search all of your e-mails for specific information. Use Filer as your inbox replacement. Outlook allows you to view the

contents of your inbox by opening new windows. Filer, on the other hand
