Storylord Driver Mouse Rexus G7 Retro V1.1.0. Driver Mouse Rexus G7Q: How to draw separate single line of text I'm making a demo program that will interactively draw a live timeline, with point data, and a date value that is updated every 0.05 seconds for 15 seconds. What I would like to do is I want to draw the current time value at the specific point on the timeline (say I have a point at (10, 10) and that point is red), but I also need to draw a separate single line of text that will say "Point A" or whatever point in the timeline that the text is currently at. I have set up an example program below, that will create a timeline with a text next to each point and will update it to say "Point A" when the mouse enters that point, but it will not draw a text line when the mouse leaves a specific point. Is there any way to do this? import wx import wx.lib.agw.aui.layouts.statusbar as statusbar class timeline: def __init__(self, parent): super(self.__init__,self).__init__(parent) statusbar.StatusBar(self) self.CreateLayout() def CreateLayout(self): self.frame = wx.Frame(self, -1, "Demo app") self.notebook = wx.Notebook(self.frame) self.frame.Layout() self.date_label = 0 self.date_range = 0.05 self.UpdateFrame(5, 25, "jim.jpg") self.imagePanel = wx.StaticBox(self.frame, -1, "
